

Healthcare

Improve the standard of care with cost-effective document & business processes management

Taking a Paperless Approach to Managing Patient Data

Even the most efficient medical offices struggle to maintain accurate patient records while complying with increasing privacy regulations, and managing the endless maze of insurance paperwork and patient billing.

More and more healthcare organizations are turning to Questys. As the leading provider of affordable document management solutions for small and mid-size businesses, Questys Solutions provides healthcare organizations a better way of doing business, and a smarter means of managing their documents and day-to-day files.

Reduce Costs, Gain Efficiency, and Ease Compliance

Get More. Spend Less.

Questys helps address HIPAA compliance while allowing users to quickly and securely store and retrieve patient records or billing information. Whether companies are researching an insurance billing issue or answering a patient question, Questys intelligent infrastructure delivers results instantly. Automating with Questys WfX Workflow take business productivity and process automation to the next level by integrating electronic and paper documents directly into your business processes.

Additional Benefits

- Secure, real-time access to client and patient information
- Simplified regulatory compliance
- Centralized storage that allows access to patient records regardless of office location
- Reduction in overall paper costs and business resources
- Complete backup and restore procedures, making disaster recovery and scalability a snap
- Improved efficiency in copying, storing, retrieving and transferring patient records
- Reassignment of human resources
- Curbing offsite file storage costs

Deliver More Care

Questys removes the time and hassle of filing, retrieving and searching patient and billing records. With this intelligent document management software, users can search the Questys database by patient name, date of service, type of service, or even the content written on a document. Using a familiar file drawer and file folder interface, Questys allows users to mirror their existing filing processes, making it easy for any sized office to implement a Questys solution in hours, not weeks.

With a Questys system in place, HIPAA compliance, improved patient service, and disaster recovery is possible. This frees up healthcare organizations to focus on what really matters: providing patients and customers with the best care and service.

The Questys Advantage

Get More. Spend Less

Questys helps healthcare get organized

Each day the number of documents created, referenced and stored by the healthcare industry grows exponentially. Now, electronic document management solutions are no longer a luxury, but a necessity for medical offices of all sizes.

- **Reduce the costs of HIPAA compliance**
- **Quickly create electronic files for new patients**
- **Accelerate routing and approval processes**
- **Easily append lab reports, doctors notes, & other personal health records**
- **Ensure the privacy of confidential patient information**
- **Address patient questions via instant access to electronically organized, searchable files and records**
- **Improve billing and collections via immediate cross-reference searches of EOBs and EOPs to specific patient charts**
- **Minimize the cost of maintaining records and storing patient charts.**
- **File patient charts and lab reports more accurately and timely**
