

QUESTYS CONNECT

Now that you've implemented a document Management System, wouldn't it be great if you could maximize your return on investment by bringing the power of Questys CMx to as many applications as possible? With Questys Connect you can!

Questys Connect allows you to enable virtually any application in your organization without writing code and allows you to effortlessly submit documents to, and retrieve from, your CMx repository directly from within all your applications.

Questys Connect eliminates the need for you to make the difficult and expensive decisions regarding which of your applications will be integrated with your CMx backend. With Questys Connect, you can integrate them all in just a few days.

By "connecting" to nearly any third-party software application, Questys Connect saves businesses valuable time and money. Now users can add, modify or retrieve existing documents from their Questys document management system repository without interrupting workflow, or having to exit or switch from one application to the next.

› Real-Time Third-Party Software Integration

The sheer number of software applications being used for accounting, contact management, enterprise resource planning (ERP), and other line-of-business functions is daunting, and can quickly drain IT resources and decrease productivity.

With Questys Connect, you can integrate your Questys document management system with virtually any third-party software application including: SharePoint, Intuit QuickBooks®, Peachtree Complete Accounting®, Microsoft® Great Plains®, MAS 90®, Goldmine®, ACT!®, NetSuite®, Salesforce.com®, Microsoft Small Business Accounting, PeopleSoft®, SAP®, Oracle® eBusiness Suite®, and Calyx Point®.

With the ability to easily integrate your software applications in a completely code-free environment, Questys Connect minimizes the need for extensive software programming and user training. By accelerating software integration, Questys Connect maximizes the performance and value of your Questys document management system. These productivity gains also enhance the user experience and help improve organizational efficiencies across the board.

› The Bottom Line

Questys Connect makes it easy and economical for businesses to integrate their Questys document management system with nearly any third-party software application.

› Additional Benefits:

- Runs exclusively on the user's desktop. No server components required.
- Installs and updates via Microsoft ClickOnce technology. No need to touch each desktop.
- Assets are XML files that can be stored centrally for easy sharing.
- Custom scripts and actions can be developed in C# or VB.NET.
- Runs under Windows XP or higher
- Requires .NET framework 3.5 or better
- Supports 32 bit Windows, IE and Firefox-based applications
