

Optimize Resources, Strengthen Performance

Questys software is a simple solution to complex administrative and operational challenges educational professionals face daily. Teachers, counselors, principals, and administrators can easily store and retrieve all scanned paper and electronic records associated with a school, class, teacher or student or vendor, in seconds.

Content Management (CMx)

CMx is the content management solution that makes it easy and efficient for your whole team to collaborate on documents, ideas, and conversations.

Digital Documents (DigiDox)

DigiDox is the digital filing solution that gives you version control, check-in/check-out tracking, electronic sticky notes, and much more.

Capture

Capture is the innovative tool that automates nearly any data entry process by turning images of documents into usable data without the need for manual transcription.

Fast Forms

Fast Forms is a form generation tool that lets you instantly create customized forms from the scanned records in your Questys CMx system just by clicking a button.

Agenda Management (SBx)

SBx is the software solution designed to automate your entire board agenda process, including tabulating votes, taking roll, and keeping meeting minutes in real time.

Workflow (WFX)

WFX is the solution that lets you organize and orchestrate the complex flow of documents for input or approval, helping complete projects faster and with better accountability.
